SUMMARY

M.S. Construction Management & Technology student and Registered Architect with the Council of Architecture (India), bringing 5+ years of architecture and construction experience spanning construction documentation, site coordination, material procurement, cost estimating, and project execution. Experienced across residential, commercial, and interior projects, with additional strengths in BIM, construction technology, and multidisciplinary coordination.

EDUCATION

Arizona State University, Tempe, AZ

Expected May 2027

M.S. Construction Management & Technology | Cumulative GPA: 3.86/4.00

Relevant Coursework: Information Technology in Construction; Sustainable Construction

Current Coursework: AI in Construction; Trenchless Technology; Public Works Capital Construction

Ansai School of Architecture, Dr. A.P.J. Abdul Kalam Technical University, India

2020

Bachelor of Architecture

PROFESSIONAL EXPERIENCE

Graduate Service Assistant | Arizona State University, Tempe, AZ

Aug 2026 - Present

- Support course operations for approximately 120 students, managing attendance records, grading workflows, Canvas grade entry, course data, and classroom coordination using Canvas and Google Sheets.

Freelance Architect & Construction Consultant | Varanasi, India

Nov 2023 - Jul 2025

- Delivered architectural design and construction consulting across 50+ residential and interior projects, producing construction drawings, 3D models, material selections, and execution documentation while coordinating directly with clients and project teams.
- Managed end-to-end execution for 4+ residential and interior projects, coordinating clients, labor/subcontractors, material selection and procurement, and on-site implementation from design development through completion.
- Prepared quantity takeoffs, BOQs, and preliminary cost estimates for small-scale projects to support budgeting, procurement, and construction decisions.

Architect | Rajawat Construction, India

Jun 2020 - Oct 2023

- Contributed to 15+ residential projects and multiple commercial and interior projects through design development, construction documentation, site coordination, and execution support.
- Prepared working and coordination drawings and coordinated with site managers, contractors, consultants, and vendors to clarify drawing and site questions, coordinate materials and work sequencing, and resolve constructability issues.
- Conducted site visits to monitor progress, workmanship, materials, and conformance with project drawings while supporting material selection and quantity review.

Architectural Intern | Ravi Prakash Architects, Lucknow, India

Jun 2018 - Nov 2018

- Supported residential, cultural, and redevelopment projects, producing plans, elevations, sections, details, and 3D visualizations and participating in site visits.

TECHNICAL SKILLS & CREDENTIALS

Construction/BIM: Autodesk Construction Cloud (ACC/BIM 360), Revit, AutoCAD, BIM workflows, construction documentation, quantity takeoffs, BOQs, preliminary cost estimating, material procurement

Design/Visualization: SketchUp, Twinmotion, Lumion, Photoshop

Productivity: Microsoft Excel, Word, PowerPoint, Google Sheets

Credential: Registered Architect- Council of Architecture (India), 2021-Present

SELECTED PROJECTS

Digital Twin Applications in Construction | Arizona State University

Spring 2026

- Coordinated a team investigation of digital-twin applications in construction, conducting industry interviews and evaluating BIM, Autodesk Construction Cloud, photogrammetry, and 360-degree reality-capture workflows.

Data Center Energy Assessment | Arizona State University

Spring 2026

- Evaluated sustainability and energy strategies for a proposed 11-GW AI data-center campus, assessing geothermal baseload potential and energy-performance considerations using a 1.5 PUE design assumption.

Redevelopment of Chandigarh Railway Station | B.Arch Thesis

2020

- Developed a large-scale station redevelopment concept with a proposed capacity of approximately 90,000 passengers, addressing arrival/departure flows, security, accessibility, vertical circulation, daylighting, and steel-and-glass design strategies.
